

Notice

As a result of several fires on cargo aircraft possibly started by defect or counterfeit lithium batteries, the FAA is studying ways and rules governing safe transport of the batteries and/or products with lithium batteries included.

Until the rules are defined and published, Spinwave will no longer ship our sensor products with lithium batteries included.

Please source Lithium batteries locally.

Spinwave Systems recommends:

For A3 sensors: AA Energizer Lithium batteries, type L91 1.5V

For EM sensors: AAA Energizer Lithium batteries, type L92 1.5V
